POWEROBJECTS AND DYNAMICS 365:
CONNECTED ENTERPRISE FOR GOVERNMENT

Common Challenges in Government Agencies

Disengaged Citizens

Constituents quickly disengage when their government organizations fail to deliver the 'always-on' service levels offered in other industries by businesses like Uber and Amazon.

Operational Redundancies

Governments are plagued by siloed data in the form of paper records and disconnected digital systems, leading directly to operational inefficiencies and the need for process automation.

Lack of Data Privacy and Security

From regulatory inspections to compliance standards, government agencies are under increasing pressure to protect the data of citizens from internal and external threats alike.

Outdated Legacy Technology

Citing risks that were long ago debunked, many in the government sector are still dragging their feet when considering a digital transformation that moves them to the cloud.

> " I would definitely recommend Dynamics 365 to other local government organizations. There is a lot more functionality than you might originally even see. That's what I've appreciated about PowerObjects – they've helped us see and realize that the sky's the limit in terms of what we can accomplish with Dynamics. "

JAKE ANDERSON,
PROJECT MANAGER

Stearns County Minnesota

It's time for a new approach to...

Citizen Engagement	Asset Management	Building Trust
Open communication lines with citizens on any device. Connect with the community utilizing easy-to-use self-service customer portals that connect seamlessly to back-office operations.	Take a *proactive* approach to asset management by knowing what you have, where you have it, and whether it needs your attention *before* issues arise.	The government is always in the eye of the public, and complete insight through business intelligence builds trust. Low-code apps for government processes close gaps that cause discrepancies.

FOUR PILLARS OF SUCCESS

100% focused on providing end-to-end **SERVICE** for Dynamics 365 with the power of Business Applications

Offering responsive and on-demand **SUPPORT** for Dynamics 365 and Business Applications

#1 Partner in the world for Dynamics 365 and Business Applications **EDUCATION** and training

Over 25 PowerPack **ADD-ONS** to enhance the functionality of Dynamics 365

POWER OBJECTS

Rapid Platform Development with PowerObjects: Agility, Productivity, and Insight Await!

PowerObjects is a holistic provider of services covering CRM, ERP, Power Platform, and everything in between. When Government entities choose Microsoft Business Applications as their one connected platform, they can handle anything that comes their way.

Combining **Office 365** with Microsoft Business Applications – like **Power Platform** and **Microsoft Dynamics 365 CRM** and **ERP** – enables communication tracking and automation of all business processes. This technology solution provides transparency and accuracy every step of the way.

Dynamics 365 also enables direct connections and integrations with over 300 platforms so government organizations can really focus on customer and citizen centricity. This cloud-based ERP and CRM platform leverages artificial intelligence and powerful insights through the Power Platform.

You can now calculate rates with Dynamics 365 thanks to our Power Rates Calculator.   **LEARN MORE**

Why PowerObjects as your Technology Partner?

PowerObjects delivers end-to-end business transformation and strategic application design-and-builds throughout the Public Sector, helping local authorities and regional government agencies innovatively solve business problems by harnessing the Microsoft Business Applications solutions, including Power Platform and Dynamics 365. Change management is always in the forefront of our projects to help agencies implement what they need, when they need it. Our experts not only assess and consult with government entities to ensure technology adoption is high, we also instruct and guide them on how to best implement change with their citizens.

Custom apps, Microsoft tools, and virtual education are just a few ways we're helping clients tackle COVID-19 challenges.   **LEARN MORE**
