

## WHY DOES YOUR BUSINESS NEED A **POWER PLATFORM COE?**

Everyone with a Microsoft Office 365 license has the ability to create apps, automations, and reports within Microsoft Power Platform, which can leave organizations open to risk:

- Data loss
- Data exposed to 3rd party (Connectors)
- Revenue impact
- Duplication of apps
- Wrong use of data sources

Before long, SMB and Enterprise organizations alike face a significant amount of Power Platform clean-up that hinders the ROI they could be achieving with this powerful platform.

HCL-PowerObjects guides our clients to use Power Platform within a governance structure that empowers users to balance business productivity with risk management and security.

“ Power Platform empowers users to create efficiencies for themselves and their teams, but with that comes risk. A thorough governance plan and Center of Excellence (COE) will ensure your organization evangelizes the capabilities while suppressing the risk. HCL-PowerObjects provides the expertise and experience to help ensure that your organization is well positioned in these areas to facilitate the growth of Power Platform in a manageable and scalable way. ”

**Josh Darragh,**  
Power Platform Practice Director  
at HCL-PowerObjects

### Through our Center of Excellence (COE) Offerings, you can...

Improve technical  
control

Create an app  
maker community

Assess legacy  
applications

Achieve legacy  
modernization

Receive ongoing  
support and  
education

# Three Scalable Power Platform COE Offerings

## FROM HCL-POWEROBJECTS

Microsoft's COE Starter Kit provides a good starting framework, and we help organizations take their COE to the next level through managing and monitoring the app-maker community and customizing to their business needs, saving time and money.
