

MICROSOFT DYNAMICS 365 PROJECT OPERATIONS

Deliver projects on time
and on budget, every time.

Managing a project from A to Z involves more detail than a spreadsheet can handle. When you add an increased level of remote work and online team collaboration, it's easy to lose track of the time, cost, and resources spent on any given task.

Dynamics 365 Project Operations delivers the very best in project management, resource scheduling, and collaboration. It offers users real-time analytics, seamless integration with Microsoft Teams, and hyper automation with the Power Platform.

Dynamics 365 Project Operations Capabilities

**Real-time
Analytics**

**Connected
Sales Team**

**Quote
Management**

**Flexible Pricing
Models**

**Project
Dashboards**

**Forecasting
and Pipeline
Visibility**

**Configurable
Resource
Management**

Why Use Dynamics 365 Project Operations?

- ✓ Accelerated project delivery
- ✓ Streamlined processes that improve quality of work
- ✓ Enhanced teamwork capabilities – including document sharing and more – through Microsoft Teams integration
- ✓ Simplified operations for routine tasks like costing, budgeting, and revenue recognition
- ✓ Configurable resource management to ensure the right people are working on the right projects at the right time
- ✓ Project accounting shows visibility into project specific KPIs, including practice utilization, profit, and more
- ✓ Project management tools that connect teams
- ✓ Maximized profitability

With Dynamics 365 Project Operations, you connect your project-centric business in a single application. You'll gain richer visibility, deeper collaboration, and more widespread agility across your entire organization.
