

Boot Camp 400

Dataverse Processes

Course Level: 400

The time has come for you to take your rightful place as an automation wizard at your organization by discovering all the ways you can make Dynamics 365 and Power Apps model-driven apps work smarter. This capstone course in the Dynamics 365 University Dataverse Boot Camp Series explores automated and interactive features native to Dataverse that you will use to build out unique processes for your organizational needs. The course provides hands-on practice adding logic and automation to forms with business rules, creating business process flows to help guide your users through a process and leveraging Dataverse workflows and custom actions to automate routine tasks. Learn how to build efficiencies into your processes to become the hero of Dataverse!

At A Glance:

Boot Camp 400 – Dataverse Processes

Why Enroll?

Discover ways to make model-driven apps work smarter. Build efficiencies into your processes with automated and interactive tools native to Dataverse.

Key Takeaways

Business rule actions, logic and scope, Workflow actions, logic and properties, Concurrent, branching and multi-entity Business Process Flows with workflows and action, Process management and deployment.

Who to Enroll?

- Administrators
- System Customizers
- Developers

About This Training

Intended Audience

This course is designed to prepare individuals who will be administrating, configuring, customizing or maintaining Dataverse environments with Dynamics 365 or Power Apps model-driven apps for their organizations.

Required Prerequisites

- Boot Camp 100 – Introduction to Model-driven Apps or equivalent experience/skills
- Boot Camp 200 – Dataverse Administration and Security or equivalent experience/skills
- Boot Camp 300 – Dataverse System Customizer or equivalent experience/skills

Recommended Prerequisites

Prerequisites are recommendations, and while not required, they are highly advised to ensure a successful learning experience:

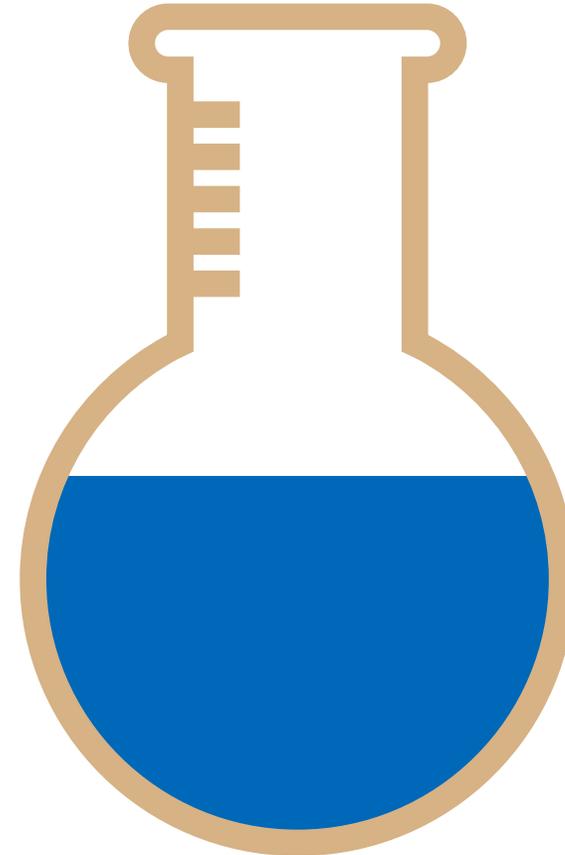

- Exposure to a Microsoft Dynamics 365 model-driven app (Dynamics 365 Sales, Dynamics 365 Customer Service, Dynamics 365 Field Service, Dynamics 365 Marketing, or Dynamics 365 Project Operations Lite)

Key Takeaways

This Training Will Allow You To:

- Define business rule logic to automate user form interaction
- Create real-time workflows which execute complex logic when a record is saved
- Create process action building blocks
- Use process actions in workflows and business process flows
- Import and use custom workflow activities
- Create simple business process flows to guide user actions
- Design complex business process flows with branching logic
- Add workflow and action steps to a business process flow
- Use workflows to modify business process flow table rows

SESSION 1

SESSION 2

SESSION 1

AUTOMATED PROCESSES

- Business Rules
- Dataverse Workflows
- Process Actions

SESSION 1

SESSION 2

SESSION 2

PROCESS MANAGEMENT

- Custom Workflow Activities
- Process Security and Authentication

BUSINESS PROCESS FLOWS

- Process Flow Logic
- Process Flow Capabilities
- Process Flow Design
- Enhance with Workflows and Actions
- Deploying Processes and Process Flow Tables
